This is the Twenty-first issue of the annual publication 'Health Information of India' previously known as 'Health Statistics of India' brought out by the Directorate General of Health Services, Ministry of Health & Family Welfare, Govt. of India. This publication provides broad-based information on various aspects of Health and related subjects and concerted efforts have been made to incorporate the latest available data.

It is hoped that the present issue of the publication will be found useful by the Planners, Policy makers, Health Administrators, Research Workers and others engaged in raising the health and socio-economic status of the community.

I gratefully acknowledge the generous co-operation of the State Health authorities and other Organisations for their keen assistance in furnishing the requisite data.

Finally, I would also like to place on record my deep appreciation for the untiring efforts put in by Sh. Shyam Sunder, Deputy Director, Sh. R.G.Gupta, Asstt. Director, Haji S.M.T. Farooqui, Asstt. Director and other technical staff of the C.B.H.I. under the able guidance of Dr.A.K.Seth, Director, CBHI in bringing out this publication.

Any suggestions for further improvement of the publication will be highly appreciated and these may be addressed to Director, CBHI, D.G.H.S., Pushpa Bhavan, New Delhi.

INTRODUCTION

For proper monitoring and evaluation of Health Programmes and in order to have an overview of the developments taking place in the field of Health and related areas, it is essential that the planners, decision makers and health administrators do have support from a suitable data base.

2. To achieve the above objective, the Central Bureau of Health Intelligence (CBHI) in the Dte. G.H.S. has been making constant endeavour by making available broad-based data on Vital and Health Statistics through various of its major publications like Directory of Hospitals in India, Para-Medical Training in India, Health Atlas in India, Health Services in India and Health Information of India. Of these, the annual publication entitled "Health Information of India" is the most comprehensive one and provides key information on almost all aspects of Health and related fields.

3. The current publication, twenty-first in the series is an output of computerised data-base, 'Health Information of India'. The publication depicts latest available data.

COVERAGE OF DATA

4. To provide an overview of the Health situation of India, the publication covers data on important aspects like pattern of investment and expenditure on health programmes, medical and paramedical education, health manpower, medical care facilities, community health services, public health statistics encompassing various National Health Programmes; mortality statistics due to major causes; performance of expanded programme of immunisation; medical care facilities under Indian System of Medicines and International Comparative Statistics. Besides, data on important socio-economic indicators and vital events is also covered in the publication.

SOURCES OF INFORMATION

5. The data depicted in this publication have been derived mainly from two sources, namely (a) Central Ministries/Departments (b) State Health authorities and autonomous organisations. The socio-economic indicators related to health and data on population and vital events, have been obtained directly from the concerned Ministries/Departments.

On the other hand, major data related to Health Sector like medical care facilities, health manpower, medical/paramedical education, community health services, national health programmes etc. have been derived by this Bureau from the State Health Directorates and concerned Programme Officers. The contributions by the various departments and organisations are gratefully acknowledged. The source has been indicated in each Table.

5. Information System Division, National Informatics Centre, Planning Commission is assisting CBHI under Health Management Information System (HMIS) in collection of data from state/U.Ts.

6. It is hoped that this publication will be found useful and handy by the readers. Suggestions for improvements are most welcome.

NOTE : 1. This series of annual estimates as on 1st March, 1971-1981 has been made by breaking the decadal exponential growth rates into annual using Newtons coefficients. This method could not be used in case of Arunachal Pradesh as data for only three censuses were available. Arunachal Pradesh estimates have been done by using Newtons coefficients on the population itself.

2. The aggregate over the States and Union Territories will not exactly tally with India which has been estimated direct. The differences however are very minor.

3. The census in Jammu & Kashmir was conducted in May 1981, having a reference data of 6 May 1981. This populations as on 6-5-81 has been estimated as on 1-3-81 to conform to the reference data for rest of the States.

TABLE NO. 5.03 : MINIMUM NEEDS PROGRAMME : TARGETS AND OUTLAYS IN 8TH FIVE YEAR PLAN
(1992-97)

Head	Objective	Outlays (Rs. crores/ 10 million		
		States/UTs	Central * Sector	Total
1	2	3	4	5
1. Rural Health	1. Consolidation and operationalisation rather than major expansion of the net-work of Sub-Centres, PHCs & CHCs so than performance is optimised.	2250.38	1.00	2251.38
	2. To monitor the progress of implementation of MNP at the district, State & National Levels, a health information management system will be developed and used.			
	3. The rural hospital & dispensaries will be suitably modified and equipped and staffed to convert them into sub-centres, PHC, CHC as case may and thereby integrated them into Primary Health Care System.			
	4. Mechanism will be developed to make rural health service responsible to the needs of rural masses and accountable to the community panchayati raj system would become an effective instrument for eliciting community participation in health programme and providing supervision and support to primary health care infrastructure.			
	5. The targets regarding setting up of Sub-Centre, PHC & CHC on the basis of population norm are indicative only. The States will be given flexibility in establishing these units as per the local needs depending on geographical and population consideration, resources, manpower availability etc. In opening new centres the needs of Tribal population and communities living in difficult and inaccessible areas will be given first priority.			

Table No. 5.03 Contd.

6. Linkages will be developed with the sub-divisional and district hospital to provide referral backup.

2. Rural Water Supply	1. Highest periority to be given to ensure that about 3000 "no source" hard care problem villages are provided with sustainable and stipulated supply of drinking water by March,1993.	4954.52	5100.00	10054.52
	2. Equally important would be to ensure that all the partially covered villages having a supply level of less than 40 litres per capita per day(IPCD) numbered about 1.5 lakh including hamlets, are fully covered with safe drinking water facilities by the end of the 8th plan on sustainable basis.			
	3. The expected cumulative coverage at the end of 8th plan is 674.80.			
3. Nutrition	The National Programme of ICDS will continue to be the basic strategy for child survival and early childhood development with special focus on areas predominantly inhabited by tribal prople, Scheduled Castes, drought prone regions and Urban slums.	178631.00	-	178631.00
